

MINE STRIKE COST C. F. & I. \$1,250,000

Directors Follow Suggestion of Industrial Relations Body.

THOROUGH REVIEW OF CONDITIONS MADE

Meeting Held at 26 Broadway Well Attended—Gould and Bowers Quit Board.

The suggestion of the Federal Commission on Industrial Relations in its investigation of the Rockefeller enterprises that directors of the Colorado Fuel and Iron Company should acquaint themselves more fully of its affairs here fruit yesterday, when the regular monthly meeting of the board was held in this city at 26 Broadway.

At yesterday's meeting George J. Gould and L. M. Bowers, of Binghamton, N. Y., submitted their resignations as members of the board. Mr. Gould gave as his reason for leaving his association with the railroad companies...

President J. F. Welborn presented a statement showing that the direct cost of the strike, which was called in December 1914, was \$1,250,000. The indirect cost, he said, due to loss of business in the fuel department, he estimated at from \$700,000 to \$800,000, the total direct and indirect cost being approximately \$2,050,000.

"We have furnished employment to the maximum number of men at all of our operating mines, in order to take care of as many as possible of the displaced strikers."

The directors referred to the executive committee of the company at yesterday's meeting a resolution providing for more adequate and comfortable housing facilities at the company camps.

In his report of the financial condition of the company Mr. Welborn showed that the previous year's earnings amounted to \$1,403,408, against \$1,312,827 for January, 1914, and \$2,169,789 for the similar month of the previous year.

Market conditions in the territory where Colorado coal is sold, Mr. Welborn said, have not been so bad for almost twenty years as they are today.

INCORPORATED AT ALBANY

Albany, Feb. 25.—Incorporations filed with the Albany County Clerk's office and made public today were:

Underwear manufacturers are gradually using larger quantities of narrower materials, but some importers complain that this business so far has not been as important as was expected with the return of the wider skirt.

Many large dress manufacturers are showing a neat summer dress made of Palm Beach cloth. That material will be worn extensively for the summer season is the reason for this.
